

Declaration

This report has been prepared based on my own work. Where other published and unpublished source materials have been used, these have been acknowledged in references.

GenAI Usage Statement goes here - see guidance notes below.

Word Count: *The final word count*

Student Name: *Your full name*

Date of Submission: *Submission date*

GenAI Usage Statement Notes (these notes are for guidance only, do not include these notes in your report)

You are required to include a statement in your report describing any use of generative artificial intelligence (GenAI) tools (e.g. ChatGPT, GitHub Copilot, etc.) in your project. When completing this section:

Provide a clear account of how generative artificial intelligence (GenAI) tools were used (e.g. ideation, code explanation, debugging, drafting text, literature exploration).

Ensure that your statement is accurate and proportionate. If no GenAI tools were used, this should be explicitly stated.

Statements such as “GenAI was used” are insufficient; you must explain the nature and extent of its use.

Confirm that all GenAI-generated outputs were critically reviewed, validated, and, where appropriate, adapted.

The submitted work must reflect your own understanding, judgement, and academic contribution.

Do not include raw prompts or transcripts within the declaration; these may be included in an appendix where relevant.

Recommended approach:

In 3–5 sentences, summarise how GenAI tools (if any) were used, what tasks they supported, and how you ensured the final work reflects your own understanding.

Optional (where relevant):

If GenAI significantly influenced your project (e.g. code generation or design decisions), you may include brief supporting examples in an appendix, including prompts.
